

***SPARE PARTS AND CONSUMABLES  
FOR INDUSTRIAL PRODUCTION  
AND HANDLING EQUIPMENT***

---

***TIEBER*** ***Technology GmbH***

*Spare parts for "Round Table" and other NC machines"*

*Spare parts and tools for "Multi-Toolhead" machining centres*

*Hydraulic, pneumatic, electrical and mechanical spare parts for press centres*

*Spare parts for handling, welding and special purpose robotic systems*

## **Tieber Technology GmbH**

was founded to be a supplier of spare parts and consumables for existing "out of warranty" production and handling equipment. We will find spare parts also for your older equipment and we will keep it going.

In your enquiry you provide us with the name and maker of the machine (complete specification-plate information off the machine), the exact product number and maker of the specific spare parts, and we will provide you with our competitive quotation, together with delivery information, in form of a proforma invoice.

### **Our clients include, but are not limited to:**

Vehicle makers and their subsuppliers, engine, electromotor and aircon manufacturers, railways, foundries, casting and extruding plants, steel mills, metal processing factories with straightening, cutting, punching, lathes, milling, drilling, grinding and welding machines, lifting equipment and forklift producers and maintenance outfits, oilcompanies, refineries, chemical plants, paper mills, fresh water and sewage treatment plants, waste treatment and disposal facilities, etc.

We supply your much needed spare parts for almost any machine you may have...

*New motors, gear boxes,  
mechanical and electronic  
spare parts*

### **Spare parts, consumables and other products include:**

- Electrical and electronic components including inductors, coils, capacitors, motors, gears and controllers, as well as small components, switches, cables and printed circuit boards of various makers and functions, fuses, etc.
- Hydraulic, pneumatic and mechanical components like pumps, valves, filters, hoses, bearings, bushings, seals, gaskets, engine spares, belts, gears, tooth wheels, joints, couplings, etc.
- Custom made mechanical parts, software, plant upgrading and automation, test facilities, general overhaul, tools and measuring devices, safety equipment and materials, used production equipment for various industries, etc.

### **Our special services include:**

- Rapid prototyping
- Tools, dies and fixtures
- Design and production of single and multi stage punching dies
- Aluminum die casting and plastic injection moulds
- Continuous casting and extruding lines
- Waste treatment facilities
- Consulting services to improve processes and methods in your factory.

*PCB cards for various tasks and  
from various makers*

*...any type of electric or  
electronic parts for high and low  
voltages and currents*

*Die and mould design,  
production and repairs*

*Fixtures for machining, welding  
and test centres*
